PERFORMANCE FABRICS

Where Innovation Meets Performance

Sustain Performance Fabrics[®] can be easily cleaned with a soap + water or a bleach + water mixture and can withstand the use of common at-home disinfectant options.

- Did you know that Sustain Performance Fabrics[®] has always been bleach safe and durable due to the state of the art yarn technology?
- There is no need to purchase any special products. Common at-home cleaners and disinfectants such as Lysol[®] and Clorox[®] can be used without discoloring or degrading the fabric.
- Proudly free of PFC chemicals, supporting a healthier and cleaner performance fabric option.

Sustain Performance Fabrics[®] are proudly woven in the USA.

PERFORMANCE FABRICS

CLEANING GUIDE

- Vacuum with a soft brush attachment to remove loose debris.

- To remove everyday stains, such as dirt and spills, use a soap and water solution.*

- For tougher stains, such as red wine or marker, use a bleach and water solution.*

- As an additional measure of safety, complete the cleaning with an at-home disinfectant spray such as Lysol[®] or Clorox[®].*

The Center for Disease Control (CDC) recommends following the general cleaning instructions for your softgoods prior to disinfecting them.

* Use as directed. To learn more visit:
